Special Meal Accommodations

Dear Parents/Guardians,

At Tempe Elementary School District, we understand the importance of dietary accommodations for medical conditions affecting our students. The Nutrition Services Department will provide special diet accommodations to students with disabilities or medical conditions. The attached **Special Medical Diet Request Form** must be completed and signed by a state licensed health care professional authorized to write medical prescriptions. Lactaid milk is offered to children that cannot drink milk due to lactose intolerance. To request this substitution, please fill out *only* the top portion of the attached form, signed by a parent/guardian (no health care professional signature is required).

The Special Medical Diet Request Form must be completed in its entirety and returned to your child's school Nurse's office or emailed to haley.dean@tempeschools.org. This form must be updated if any changes in medical history should occur anytime throughout the year or into a new school year. Please allow up to 5-7 business days for processing. We use this time to ensure we have all the necessary information to complete the diet plan and communicate with all parties involved.

Our schools are peanut/food allergy sensitive and the focus is on awareness, communication, prevention, emergency response, and education; The school cafes are not a "peanut-free environment." Parents with concerns must have the form completed and signed as well as contact the school nurse, to plan the best course of action.

Nutrition Services does not accommodate special diets based on personal preferences or religious beliefs. We address this by offering a variety of menu options every day in the form of choices. We do not have any pork on our menu.

Nutritional and allergen information is available by accessing online menus at LINQ MENU.

For questions or concerns, please contact Nutrition Services at 480-642-1541 or reach out to Haley Dean at: haley.dean@tempeschools.org.
